DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a direct-type back light module with photo sensors having, inter alia, a comparative and arithmetic unit that generates feedback signals to adjust lamp currents that are generated by lamp driving loops based on signals transmitted from a photo detecting device or photo sensors for respectively detecting illuminations of corresponding lamps (see claims 1 and 5). The remaining claims 2-4 and 6-13 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1 through 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hirakata et al., Patent No. 6,636,190 ; Hur et al., Pub. No. 2004/0232853 ; Kim et al., Pub. No. 2004/0125071.

None of the above documents discloses the comparative and arithmetic unit as recited.
